

A person with their back to the camera, wearing a light-colored coat and carrying a bag, walks down a street. To the left, several cars are parked along the curb. The scene is brightly lit, with a strong light source from the right creating a lens flare effect. The right side of the image is a solid white background where the text is located.

**Find the quickest
and safest route to
Medellin's streets**

Problem Statement

**Streets
of Medellín,
Origin and
Destination**

**Three paths that reduce
both the risk of harassment
and distance**

Solution Algorithm

Keep this title

*Complete this slide
For the second
installment*

*Do NOT use red on the
slides.*

**Streets
of Medellín,
Origin and
Destination**

**Please type
in the name
of your
algorithm**

*Add the name of your
algorithm*

**A path that reduces
both distance and
harassment**

Explanation of the algorithm

Do NOT use red on the slides.

Complete this slide
For the second
installment

Use these
colors for
graphics

Design your own figures in Lucidchart or
equivalent: <https://www.lucidchart.com/>

Name of the algorithm for the path that reduces both
harassment and distance.

(In this semester, it could be DFS, BFS, Dijkstra, A*... **please choose**).

Include a high-definition image
related to the problem of sexual
street harassment.

Explain the graphs in your
own words

Complexity of the algorithm

Keep this title

Complete this slide
For the third installment

	Time complexity	Complexity of memory
Algorithm name	$O(V^2 * E * 2^V)$	$O(E! * V * E * E * 2^E)$
Algorithm name (if you have tried two)	$O(V * V * E * E * E)$	$O(E!)$

Create the table in Powerpoint. Do not copy pixelated screenshots of the white paper, please.

Do NOT use red on the slides.

Time and memory complexity of the algorithm name. V is...E is... (In this semester, it could be DFS, BFS, Dijkstra, A*). Please explain what V and E mean in this problem. **PLEASE, it is not helpful to put 'n'.**

Explain the tables in your own words

Include a high-definition image related to the problem of sexual street harassment.

Use superscripts to represent exponents. **Do NOT use the ^ symbol.**

The font size must be at least 22 points.

First path minimizing $d = ???$

Keep this title

Complete this slide
For the third installment

Do NOT use red on the slides.

Create the table in Powerpoint. Do not copy pixelated screenshots from the white paper, please.

Origin	Destination	Distance (meters)	Risk of harassment (between 0 and 1)
EAFIT University	National University	??	??

Distance and risk of harassment for the path that minimizes $d = ??$. Execution time of ?? seconds.

Explain the tables in your own words

The font size must be at least 22 points.

Second path minimizing $d = ???$

Keep this title

Complete this slide
For the third installment

Do NOT use red on the slides.

Create the table in Powerpoint. Do not copy pixelated screenshots of the white paper, please.

Origin	Destination	Distance (meters)	Risk of harassment (between 0 and 1)
EAFIT University	National University	??	??

Distance and risk of harassment for the path that minimizes $d = ??$. Execution time of ?? seconds.

Explain the tables in your own words

The font size must be at least 22 points.

Third path minimizing $d = ???$

Keep this title

Complete this slide
For the third installment

Do NOT use red on the slides.

Create the table in Powerpoint. Do not copy pixelated screenshots of the white paper, please.

Origin	Destination	Distance (meters)	Risk of harassment (between 0 and 1)
EAFIT University	National University	??	??

Distance and risk of harassment for the path that minimizes $d = ??$. Execution time of ?? seconds.

Explain the tables in your own words

The font size must be at least 22 points.

Visual comparison of the three paths
